SAN FRANCISCO | PROFIT & BACK-OFFICE PARTNER FOR SMALL RESTAURANTS & C-STORES

$0 UPFRONT 14-DAY PILOT

Built for Small Restaurant, Bakery & Convenience Store Owners Who Do It All

When you run an independent restaurant, bakery, deli, or neighborhood convenience/liquor store, you work two full-time jobs: running the floor all day, and fighting paper vendor invoices, POS barcode updates, and delivery app deductions at midnight. Because no owner has time to audit every SKU line item every week, **the average store silently leaks 6% to 11% of its revenue ($60,000 to $210,000/year)**. **MarginVault AI** is your done-for-you back-office profit partner—with **zero software dashboards to learn**.

3. 8:00 PM Weather-Adjusted Bake & Prep Forecaster	Combines your historical POS hourly item sales + tomorrow's Bay Area weather forecast (rain/cold spikes pastries, soups & hot drinks +20%) + payday/holiday calendars to text your baker or kitchen manager tomorrow's **exact tray & prep count** at 8:00 PM.	**+$1,100 to +$3,400 / mo**
4. Neighborhood Hospital & Office Catering Engine	Automated B2B morning & lunch catering outreach to hospital departments, clinics, schools, and offices within 2 miles of your shop—booking recurring $300–$600 catering drop-offs directly into your kitchen calendar.	**+$2,800 to +$4,400 / mo**
